

**IRDR-ICoE:** Risk Interconnectivity and Governance on  
WEather/Climate Extremes Impact and Public HEalth  
(IRDR-ICoE-RIG-WECEIPHE)

Renhe Zhang

Professor of Meteorology & Vice-President  
Fudan University, Shanghai, China

# CONTENTS

01  **Rationale**

02  **Mission and value chain**

03  **ICoE Development**

04  **Expected Outcomes**

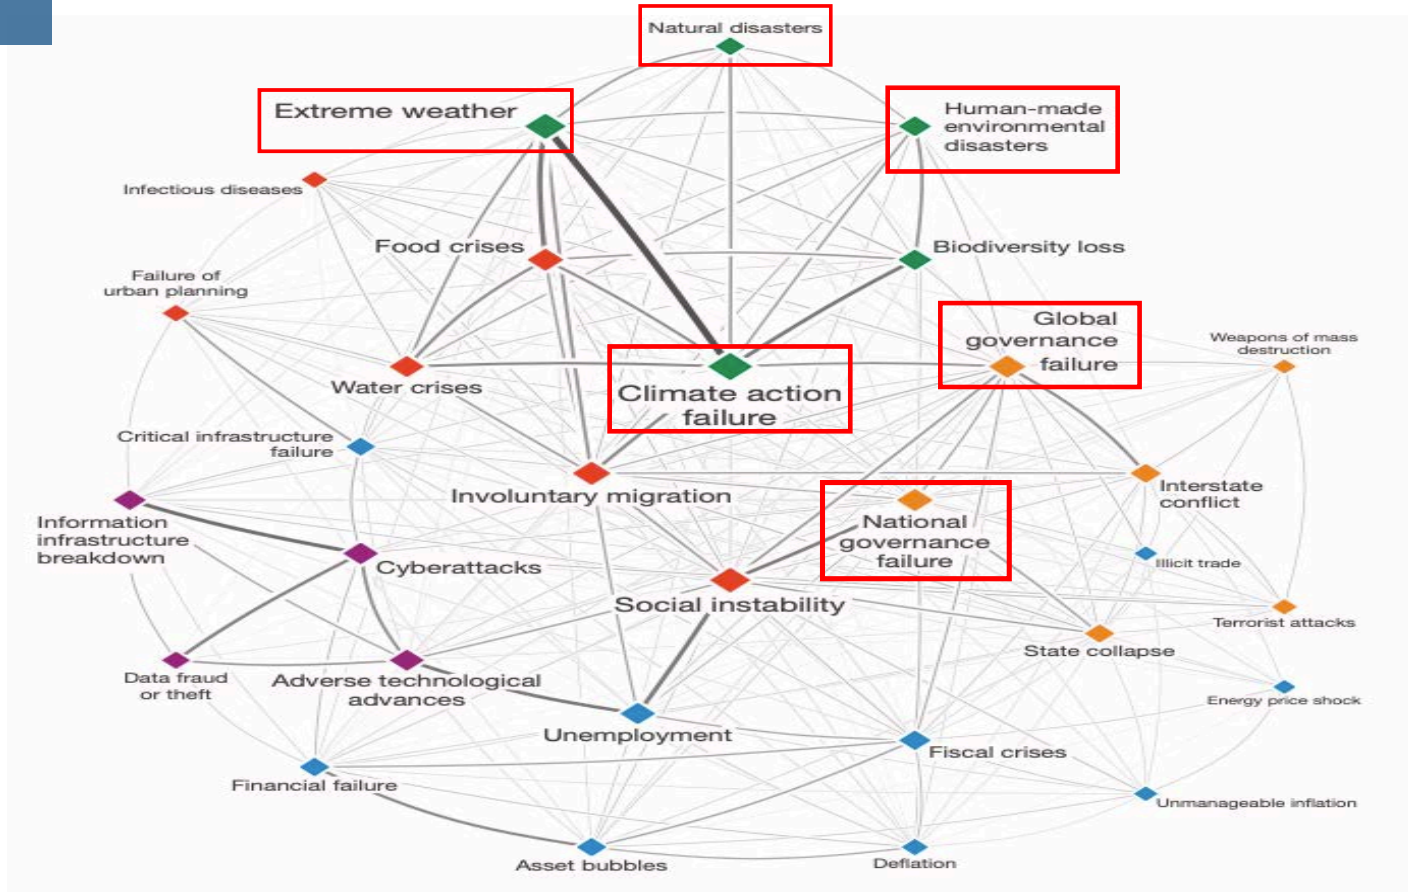

05  **Available resources and capacity**

# Rationale

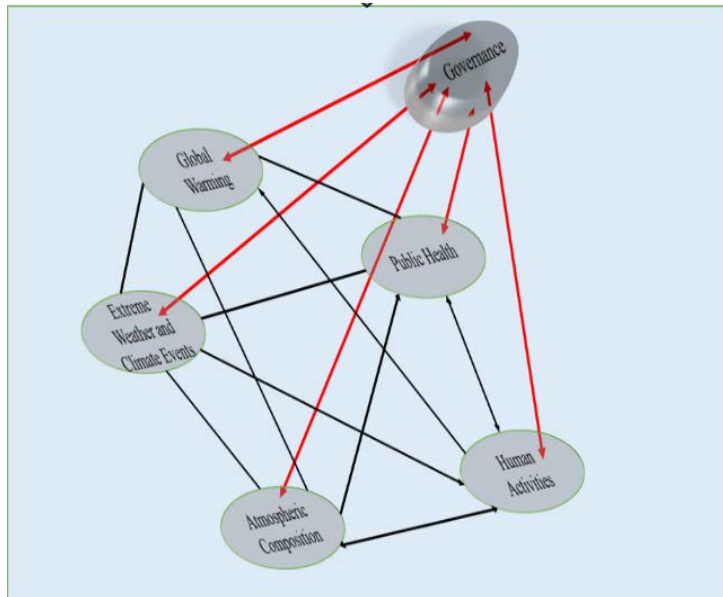

# Risk Interconnection

Interconnectivity map of global risks (WEF-GRR, 2020)

## Risk Interconnection

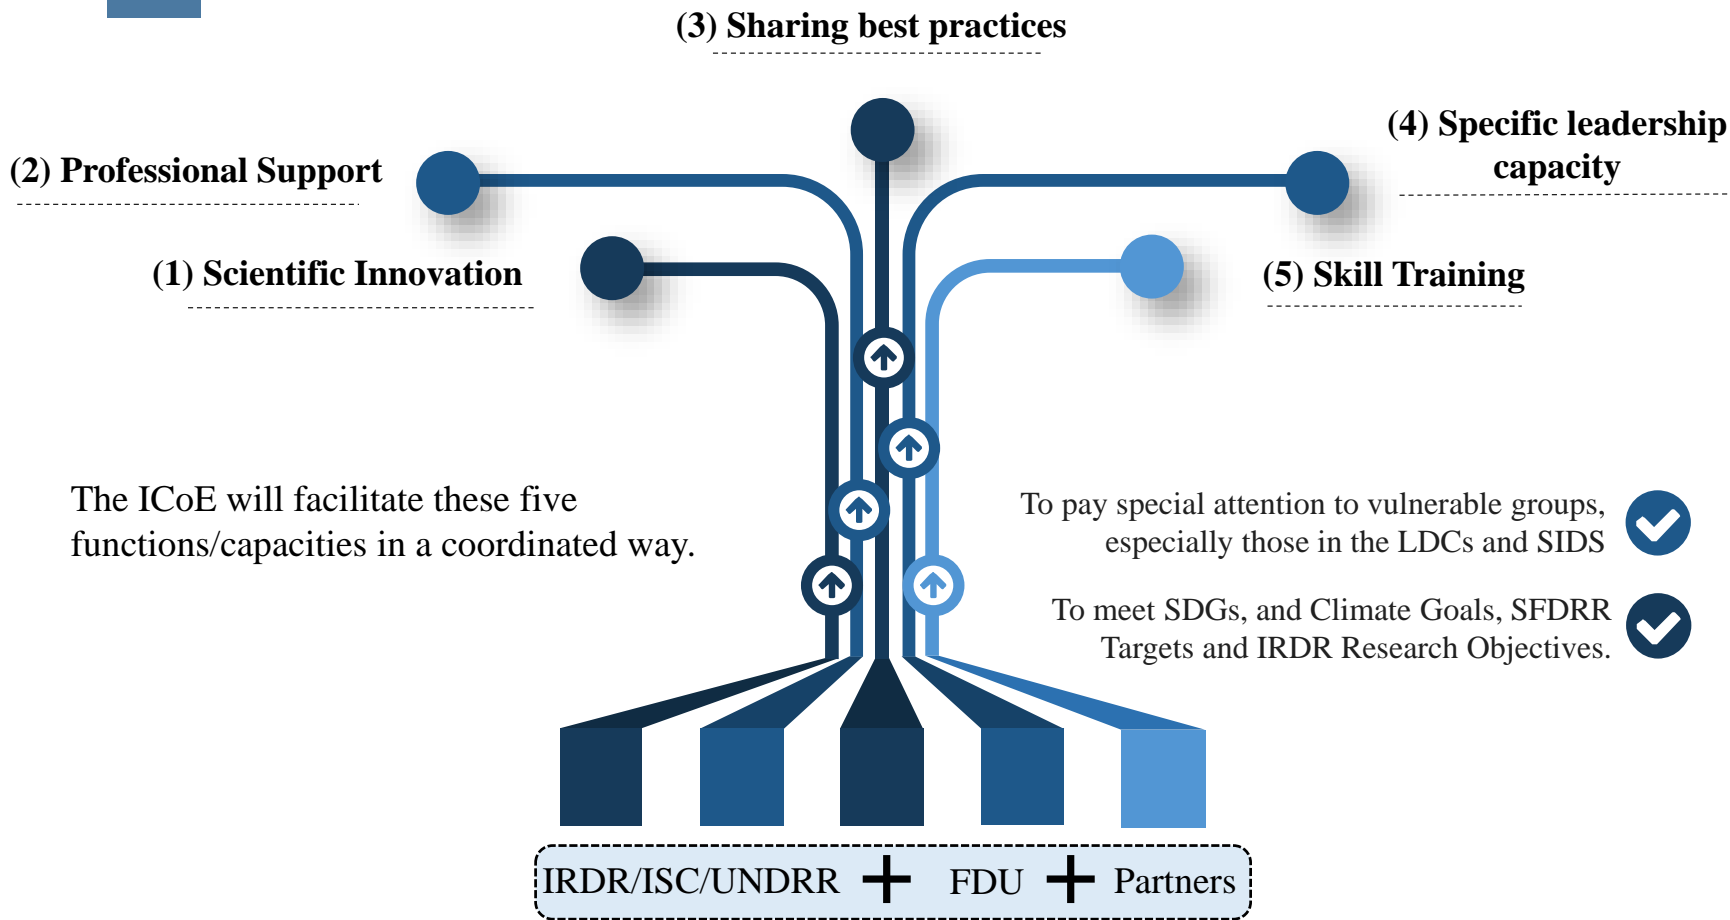

Needs to upgrade from individual impact studies to integrated approach for better governance.

- The impact of climate change is not only scientific scenarios in the long run, but also a **climate emergency and crisis** which is happening **at the moment**. (e.g. heatwave, wildfire)
- Global climate and air pollution risks and their impacts on public health are of a high degree feature of **without borders**. (e.g. epidemic diseases: dengue, malaria, influenza)
- Yet up to date, few researches were conducted to explore the interconnectivity of those risks and their impacts on the public health.

**02**

## **Mission and value chain**

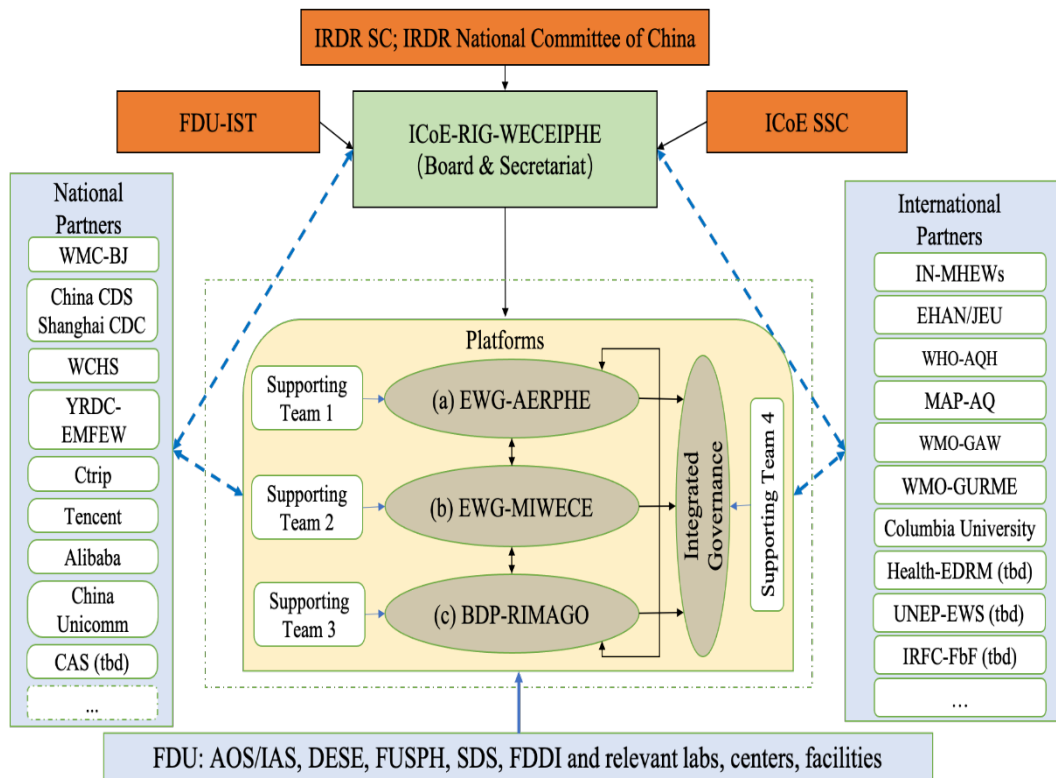

**03**

## **ICoE Development**

# ICoE Structure

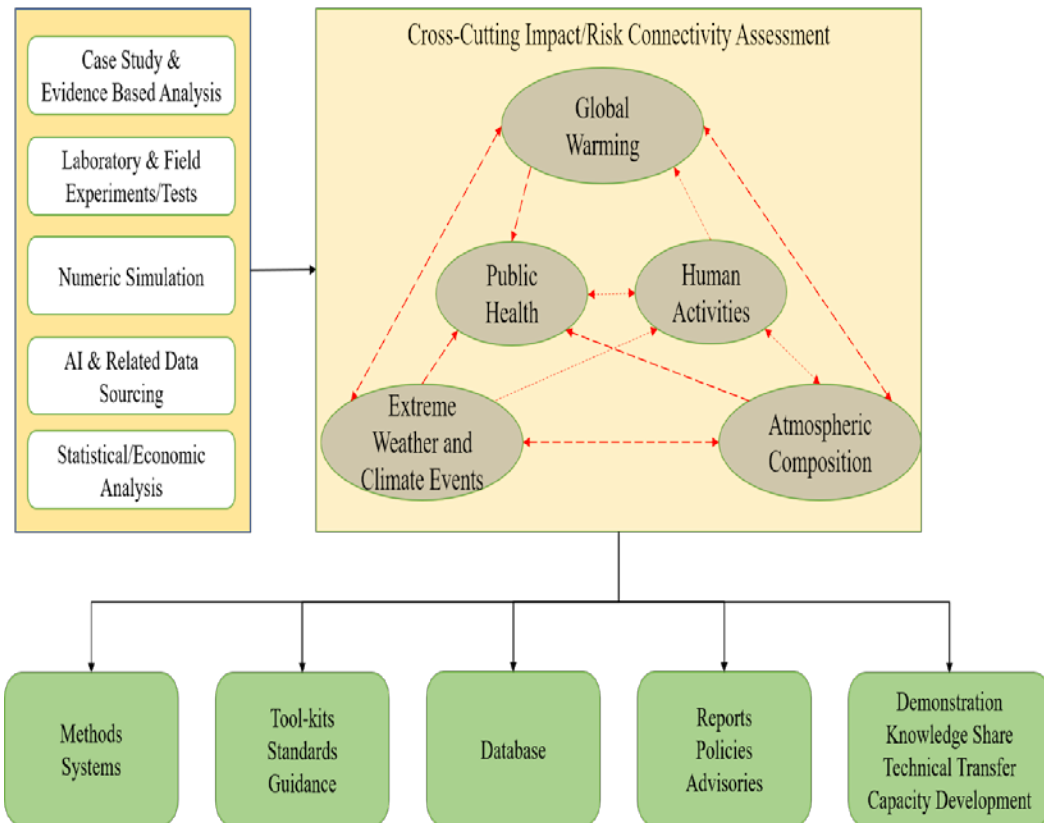

## Platforms/Pillars

- (a) EWG-AERPHE  
Early Warning and Governance on Atmospheric Environment Risks on Public Health
- (b) EWG-MIWECE  
Early Warning and Governance on Multiple Impacts of WEather/Climate
- (c) BDP-RIMAGO  
Big Data Processing in support of Risk Management and Governance

## Technical Routes

- to establish practical, actionable, transferable eligible interdisciplinary **international expert teams**
- with the **support** of the joint resources of **Fudan University** and relevant national and international **partners**
- to conduct **cross-cutting impact/risk connectivity assessment** and
- for **knowledge innovation** and its **sharing and transfer** in the fields of multi-risk interconnectivity in global climate change and its environment and health impacts.

Impact of climate warming  
on public health

Impact of extreme  
weather/climate events  
on public health

Impact of variation in  
atmospheric composition  
(including air pollution) on  
public health

Multi-risk big data modeling and  
analysis technologies on  
interconnection, risk prediction and  
early warning

Public governance and decision  
supporting consultation

**04**

# **Expected Outcomes**

Expected Outcomes

Significant progress on transdisciplinary innovation and integration

Technical transfer (e.g. toolkits) and technical advisory for related humanitarian activities

Make a tangible contribution to IRDR Goals and SFDRR Targets, including but not limited to:

Unhindered access to 3 pillars/platforms and big data database on multi-risk and its connectivity

Capacity development and regional demonstration, especially in LDCs

**05**

## **Available resources and capacity**

### Global Reputation

FDU is one of the most prestigious comprehensive universities in China with multi-disciplinary of humanities, social sciences, sciences, engineering, and medicine. It is ranked within the top 5% of universities in the world.

- QS ranking 2021: 34th
- THE ranking 2021: 70th
- ARWU ranking 2020: 100<sup>th</sup>

### FDU Support Units

- Department of Atmospheric and Oceanic Sciences / Institute of Atmospheric Sciences
- School of Public Health
- Department of Environmental Sciences and Engineering
- School of Data Science / Institute of Big Data
- Development Institute

- **Monitoring, Analysis, and Prediction of Air Quality (MAP-AQ)** Asian Office Shanghai
- Joint Lab on Marine Meteorology and Oceanography between Fudan University and **China Meteorological Administration (CMA)**
- **National Center** for Medical Security Pharmaceutical Economics and Health Technology Assessment
- Key Laboratory of Public Health Safety, **the Ministry of Education**
- Key Laboratory of Health Technological Assessment, **the Ministry of Education / WHO** Collaborative Center on Health Technological Assessment and Management
- Key Laboratory of Atmospheric Particle Pollution and Prevention, **Shanghai Municipal Government**
- Key Laboratory on Weather/Climate and Health, **Shanghai Municipal Government**
- Yangtze River Delta Center for Environmental Meteorological Forecast and Early Warnings, **Shanghai Meteorological Administration**
- Shanghai Qizhi AI Institute, **Shanghai Municipal Government**
- Big Data Institute for Carbon Emission and Environmental Pollution, **Fudan University**
- Institute of Population Data and Public Governance, **Fudan University**
- Institute of Medical Informatics and Image Intelligent Diagnostic, **Fudan University**
- Institute for Humanities and Social Science Data, **Fudan University**
- Institute of Artificial Intelligence and Deep Learning, **Fudan University**
- Development Institute (FDDI) with its International Advisory Board on policy and governance, **Fudan University**
- The Think Tank Alliance of the **Universities in Yangtze Delta Region** and Institute for development integration in Yangtze Delta Region, **Fudan University**

Happy to join IRDR-ICoEs! Looking forward to learning from you!
