

IRDR visibility and beyond

Shuaib Lwasa
Chair, IRDR Science Committee
SC18, Tokyo Japan

IRDR Strategic Plan to date

- * Communication Strategy
- * IRDR outputs and impact
 - * Policy briefs, National Platform, Periodic syntheses, co-organized conferences and sessions
 - * Do we also need an IRDR branded research output/s?

Advancing Integrated Research

- * Beyond networking
- * A decade long research program ought to deliver scientific outputs
 - * As part of an IRDR legacy
 - * Taking stock and identifying gaps

Two Proposal

- * A Journal Special Issue
- * A Book
 - * Targeting the end year and possible conference
 - * A handbook on IRDRR

A Special Issue

- * Proposed working title (subject to brainstorm)
 - * “Is early warning enough for response and risk reduction; from preparedness to risk reduction “
 - * Key issues
 - * underlying causes of risk, historical, social processes of disaster risk, systemic factors
- * The tools of risk management – early warning, preparedness, response and recovery – ubiquity of risk
- * Are these tools adequate to reduce loss and risk?
- * Multiple risk hazards the hindering of bouncing back better.

The Proposal

- * IRDR proposes a special issue with threaded papers that illustrate the emerging wisdom on the systemic causes of disasters for systemic response in risk reduction
- * **Tentative Outline of papers ideas**
- * Farming paper on systemic production of risk, accumulation and cycles of risks and risk profiles (editors...Shuaib Joern, John.....)
- * Paper on understanding root causes of risk, histories,
- * Early warning systems are but just one for response and may be short at risk reduction (Tonny, Irasema etc...)
- * Risk tracking, data availability and gaps for early warning (Bapon, Virginia, Susan, Mark....)
- * Communication action and response to disasters (Ann, Mark....)
- * Integrating risk knowledge for risk reduction Embedding risk reduction in development (Peng Cui.....Djilali, Uwera, Salvano.....)
- * Positioning humanitarian response to risk reduction (Real ICoE.....)

Journal Consideration

- * Natural Hazards Springer
 - * Impact Factor 1.833
 - * Available 1989 - 2017
 - * Volumes 89
 - * Issues 267
 - * Articles 5,022
- * International Journal of Disaster Risk Science
 - * Journal no. 13753
 - * Impact factor 2016
1.22
- * Elsevier International Journal of Disaster Risk Reduction

Book Proposal

- * A handbook to collate IRDR outputs and emerging knowledge over the decade long program
- * **Tentative based on the IRDR Science Plan**
- * Farming chapter integrated research
- * Characterize hazards, vulnerability, and risk
- * Understand decision-making
- * Reduce risk and curb losses
- * capacity-building, networking, and knowledge management

- * If it is a plausible idea
 - * Volunteer editors
 - * Volunteer chapter authors
 - * Invitation to scholars and practitioners outside IRDR
 - * Invitation of Young Scientists

- * Timeline

- * Book proposal ready – Jan 2018
- * Submission to Publisher ?????
 - * If accepted
- * Chapter author invitation ?????
- * Draft chapters ?????
- * Peer Review ?????
- *?????

* Thanks
