

An Impact Assessment for IRDR to track progress on the ‘integration’ agenda

Timing: A biannual review of IRDR impact (then 5 year return to ICSU).

Method: A framework identifying modes of engagement, spaces of engagement and examples of engagement for the IRDR family:

Results: IRDR Impact Dashboard

Additional: A repeat of Susan’s AIRDR literature review to demonstrate background movement

Expected outcome: Integration is mythical, collaboration is supported, science-policy is moving.

Learning: Are our goals for integration appropriate/obtainable/exceeded? Successful pathways. Blockages.

Dashboard for IRDR progress on Integration

Modes of engagement/Spaces of engagement	Integration/Hybrid	Collaboration	Pioneering
Within major science divisions		Discourse Academic paper on indicators for resilience that integrates social and political sciences	
Across major science divisions	Emergent Agent Based Modelling to show how physical and social actants interact – to allow policy scenario planning.		
Science – policy			Emergence Urban resilience planning. RIA Workshop with urban planners in London to reveal range of policy drivers for and disconnect between diffiernet mandated responsibilities for resilience
Science – practice	Concrete. Locally appropriate buildign standards researched and implemented by local government.
